

# Expectations on Privacy During Zoom Support Group Meetings

- You will need to login with the name you used to register. Once in the meeting, you can rename yourself with just your first name or initials if you choose.
- Only members who have pre-registered for the meeting can join.
- To maintain the privacy of all participants, you should be alone in a private living space when attending the meeting.
- Do not record the meeting (audio or video).
- Please do not screenshot any part of the meeting. All shared resources will be emailed out to participants after each support group.
- The meetings are meant for persons with lived experience only.
- If you require a support worker or family member to assist you with navigating the technology, once you have successfully logged on, please have them support you from a space where they cannot hear what is being discussed in the group.
- If there are any resources you would like to share with other members, email them to [info@bist.ca](mailto:info@bist.ca)

**If you have any questions please contact BIST Programs and Services Coordinator Melissa Forrest: [connections@bist.ca](mailto:connections@bist.ca) OR 647-990-1485.**
